June	6	407–496	December	12	903–988

Volume XXVI

AUTHOR AND TITLE INDEX

	NO.	PAGE
ABRAMS, E. (Bottoms). A Copper Process for Prolonged Microbiological Protection of Cellulosic Fabrics by Chemical Modification	8	630
(Rougeux, Coker). Polyvinyl Alcohol as a Warp Size for Various Staple Yarns	11	875
ADAMS, D. P. (Schwarz, Backer). The Relationship Between the Structural Geometry of a Textile Fabric and its Physical Properties. VI: Nomographic Solution of the Geometric Relationships in Cloth Geometry*	9	653
AHMAD, N. (Lang). The Bilateral Cortical Structure of Pakistani Carpet Wool (*Letter*)	12	954
ALEXANDER, E. (Lewin, Muhsam, Shiloh). Definition and Measurements of Crimp of Textile Fibers	8	606
(Shiloh, Muhsam, Lewin). The Relation between the Effective Crimp Diameter and the Fiber Diameter for Two Types of Wool Fibers (*Letter*)	10	803
ANGUS, J. (Martindale). Spindle Drafting of Woolen Slubbings	9	698
ARCENEAUX, R. L. (Reid, Frick, Jr.). A Compounded Flame Retardant for Cotton Fabrics	2	137
ATHERTON, E. (Peters). Studies of the Dyeing of Nylon with Acid Dyes. II: Kinetics of the Process†	7	497
AUSTIN, J. C. (Roberts). A Comparison of Gradient and Flotation Methods for Determining Density of Degraded Cotton	4	303
BACKER, S. (Adams, Schwarz). The Relationship between the Structural Geometry of a Textile Fabric and its Physical Properites. VI: Nomographic Solution of the Geometric Relationships in Cloth Geometry*	9	653
(Zimmerman, Best-Gordon). V: The Interaction of Twist and Twill Direction as Related to Fabric Structure	2	87
BAIRD, E. M. (Legere, Stanley). Random Tumble Pilling Tester	9	731
BANKY, E. C. (Sien). Dimensional Changes and Related Phenomena in Wool Fibers Under Stress	3	204
BARBER, R. P. (Compton, Martin, Word, Jr.). The Cyanoethylation of Cotton	1	47
BEAUMONT, R. H. (Houff). Chemical Damage in Wool. I: Determination by Paper Chromatography	11	871
BEEGAN, J. A. (Donovan, Hummel, Jr.). Identification of Textile Fibers by Dye Staining Techniques (*Letter*)	3	227
BERARD, W. N. (Gremillion, Jr., Goldthwait). Improved Weather Resistance by Acetylating Vat-Dyed Cotton	1	81
BERKLEY, E. E. (Kennamer, Mayne, Jr.). The Effects of Fiber Fineness (Micronaire) on the Weaving Contraction in Selected Cotton Fabrics	10	812
BERNET, E. J. (Dunn, Jr., Harris). Trouble Shooting in Textile Processing by Use of the Brush Uniformity Analyzer	7	569
BERNSKIÖLD, A. (Eeg-Olofsson). Relation between Grab Strength and Strip Strength of Fabrics	6	431
BEST-GORDON, H. W. (Backer, Zimmerman). The Relationship between the Structural Geometry of a Textile Fabric and Its Physical Properties. V: The Interaction of Twist and Twill Direction as Related to Fabric Structure*	2	87
BIKALES, N. M. (Gruber). One-step Process for the Cyanoethylation of Cotton	1	67
BLOUIN, F. A. (Reeves, Hoffpauir). Influence of Moisture Sorption and Other Pretreatments on the Acetylation of Cotton with Acetic Anhydride and Pyridine	4	272
BOGATY, H. (Hollies, Harris). The Judgment of Harshness of Fabrics	5	355
(Hollies, Kaessinger). Water Transport Mechanisms in Textile Materials. I: The Role of Yarn Roughness in Capillary-Type Penetration	11	829
BOSE, S. K. Some Physical Observations on a Sample of Ramie	2	114
BOGDAN, J. F. The Characterization of Spinning Quality	9	720
BOTTOMS, R. R. (Abrams). A Copper Process for Prolonged Microbiological Protection of Cellulosic Fabrics by Chemical Modification	8	630
BOUCHER, R. E. (Honold, Skau). The Effect of Partial Acetylation on the Pore-Size Distribution of Cotton Fabrics	4	263
BRENNER, F. C. (Scocca). The Prediction of the Micronaire Value for a Bale or a Group of Bales—A Statistical Study	11	899
BROWN, A. Second-Order Transition Temperature and Fiber Properties (*Letter*)	5	353
BROWN, H. M. A Continuous Method of Measuring Yarn Modulus	7	565
(Langston, Murray). Effect of Colloidal Silica Treatments on Sizing and Finishing Characteristics of Cotton Yarns	1	40
BROWN, J. J. (Fiori, Sands). The Effect of Cotton Fiber Strength on the Properties of 2-Ply Carded Yarns	4	296
(Tallant). The Effect of Twist on the Static Modulus of Cotton Hawser-Twist Cord	7	523
BROWN, R. S. (Rusca). Some Historical and Technical Aspects of Spinning	6	460
BULLOCK, A. L. (Schreiber, Guthrie). Note on the Preparation of a Partial Ester of Cotton Cellulose in Fabric Form	5	340
BURLEY, R. W. The Estimation of Sulfhydryl Groups in Wool by Means of 1-(4-Chloromercuriphenylazo)-Naphthol-2	5	332
CARPENTER, G. B. (Wheeler). Polyvinyl Alcohol Fibers	4	317
CHAKRABARTI, B. K. The Breaking Strength of Twisted Bundles of Jute Fiber and Its Relation to Spinning Quality	1	17
CHAMBERLAIN, N. H. (Jordan). The Determination of Neppiness in Carded Webs	8	579
CHEVERTON, R. D. (Vidosic). Lubrication of the Textile Spindle Bearing	8	622
COKER, J. N. (Abrams, Rougeux). Polyvinyl Alcohol as a Warp Size for Various Staple Yarns	11	875
COMPTON, J. (Martin, Word, Jr., Barber). The Cyanoethylation of Cotton	1	47
COPLAN, M. J. (Klein). A Study of Blended Woolen Structures. III: Amplification and Extended Application of the Theory of Blend Statistics*	12	914
COOK, J. M. Comparative Quality Characteristics of Selected Growths of Cotton in the 1955 Crop	7	534
COOKE, T. F. (Roth). Finishing of Synthetic Fabrics	3	229
CRAVEN, C. J. (Hertel). Cotton Fiber Bundle Elongation and Tenacity as Related to Some Fiber and Yarn Properties	6	479
CREELY, J. J. (Segal, Ziifle). Determination of the Degree of Crystallite Orientation in Cotton Fibers by Means of the Recording X-Ray Diffraction Spectrometer	10	789
DAUL, G. C. (Reinhardt, Reid). The Properties of Cotton Reacted with β-Propiolactone	1	1
DAVIS, S. M. (Lineken, Jorgensen). Cellulose Interactions with Certain Textile Resins	12	940

* Part I appeared in November 1948; II, III, and IV in July, September, and October 1951; V, February 1956.
† Part I appeared in December 1955.

* Parts I and II appeared in September and November 1955.

	NO.	PAGE
DICKSON, J. B. (Mazzeno, Jr., Reinhardt, Reid). Effect of Alkaline Hydrolysis on the Properties of Cyanoethylated Cotton	8	597
DILLON, J. H. International Wool Textile Research Conference Seminar. General Remarks on the Conference	5	361
(Levy). Static Electrification of Filaments (*Letter*)	12	953
(Woo, Dusenbury). The Reaction of Formaldehyde with Cellulosic Fibers. I: Rate and Mechanism of the Reaction	10	745
II: Mechanical Behavior	10	761
DONOVAN, J. D. (Beegan, Hummel, Jr.). Identification of Textile Fibers by Dye Staining Techniques (*Letter*)	3	277
DUNELL, B. A. (Price, McIntyre, Pattison). Stress-Relaxation and Vibrational Properties of Some Fibrous Polymers at Various Conditions of Temperature and Relative Humidity	4	276
DUNN, Jr., G. Z. (Bernet, Harris). Trouble Shooting in Textile Processing by Use of the Brush Uniformity Analyzer	7	569
DuPRÉ, E. F. (Weaver, Klein, Webre). The Cellulose–Sodium Hydroxide–Water System in the Cyanoethylation of Cotton Cellulose	7	518
DUSENBURY, J. H. (Woo, Dillon). The Reaction of Formaldehyde with Cellulosic Fibers. I: Rate and Mechanism of the Reaction	10	745
II: Mechanical behavior	10	761
EEG-OLOFSSON, T. Second-Order Transition Temperature and Fiber Properties (*Letter*)	5	352
(Bernskiöld). Relation between Grab Strength and Strip Strength of Fabrics	6	431
ENRICK, N. L. Survey of Control Chart Applications in Textile Processing	4	313
FERGUSON, A. W. (Scott). The Application of Electron Microscopy to Synthetic Fibers	4	284
Correction	5	350
FINZEL, T. G. (Fok). Improved Method for Bulk Compression of Staple Fibers (*Letter*)	9	684
FIORI, L. A. (Brown, Sands). The Effect of Cotton Fiber Strength on the Properties of 2-Ply Carded Yarns	4	296
(Sands, Little, Grant). Effect of Cotton Fiber Bundle Break Elongation and Other Fiber Properties on the Properties of a Coarse and a Medium Singles Yarn	7	553
FLETCHER, H. M. (Roberts). The Geometry and Properties of Two-Bar Tricot Fabrics	11	889
FOK, S. M. (Finzel). Improved Method for Bulk Compression of Staple Fibers (*Letter*)	9	684
FORD, F. M. (Nuessle, Hall, Lippert). Some Aspects of the Cellulose-Phosphate-Urea Reaction	1	32
FOSTER, S. H. Variables of Cure in the Resin Finishing of Cotton	2	149
FOX, K. R. (Hamburger). A New Process for Compacting Textile Materials. I: Research and Development	6	441
II: Industrial Applications	6	448
FRANKLIN, R. L. (Rivers). Teflon Tetrafluoroethylene Fiber	10	805
FRASER, R. D. B. (Macrae). The Distribution of Ortho- and Para-Cortical Cells in Wool and Mohair (*Letter*)	8	618
FRICK, Jr., J. G. (Moore, Reid). Fluorine and Iodine Compounds as Flame Retardants for Cotton	7	525
(Reid, Arceneaux). A Compounded Flame Retardant for Cotton Fabrics	2	137
FUJINO, K. (Kawai, Horino, Miyamoto). Experimental Study of the Viscoelastic Properties of Textile Fibers. II: The Influence of Physical Treatments upon the Dynamic Properties of Some Fiber-Forming Polymers*	11	852
GIDDINGS, Jr., L. E. (Steele). The Mechanical Properties of Cellulose Fabrics Treated with Monomethylol and Dimethylol Ureas	2	116
GILLESPIE, Jr., J. S. Progress in Man-Made Protein Fibers	11	881
GOLDTHWAIT, C. F. (Berard, Gremillion, Jr.). Improved Weather Resistance by Acetylating Vat-Dyed Cotton	1	81
GOTTLIEB, I. M. A Theory of Flame-Retardant Finishes	2	156
GRANT, James N. Certain Physical Properties of Selected Samples of Chemically Modified Cottons	1	74
(Fiori, Sands, Little). Effect of Cotton Fiber Bundle Break Elongation and Other Fiber Properties on the Properties of a Coarse and a Medium Singles Yarn	7	553
(McDonald, Humphreys, Kromhout). Physical Properties of Chemically Modified Cottons. I: Properties of the Untreated Cottons	8	641
(McDonald, Humphreys, Orr). II: Effects of Partial Acetylation	8	646
(Nott). Physical Properties of Cotton Reacted with Beta-Propiolactone	9	673
GREMILLION, Jr., S. G. (Berard, Goldthwait). Improved Weather Resistance by Acetylating Vat-Dyed Cotton	1	81
GRIMES, M. A. (Werman). Effect of Laundering on Shirts (*Letter*)	2	112
(*Reply to Letter*)	9	681
GRUBER, A. H. (Bikales). One-step Process for the Cyanoethylation of Cotton	1	67
GUTHRIE, J. D. (Bullock, Schreiber). Note on the Preparation of a Partial Ester of Cotton Cellulose in Fabric Form	5	340
(Hamalainen). Bromine-Containing Phosphonitrilates as Flame Retardants for Cotton	2	141
(Hamalainen, Reeves). Cotton Made Flame-Resistant with Bromine-Containing Phosphonitrilates in Combination with THPC Resins	2	145
HALL, W. P. (Nuessle, Ford, Lippert). Some Aspects of the Cellulose-Phosphate-Urea Reaction	1	32
HAMALAINEN, C. (Guthrie). Bromine-Containing Phosphonitrilates as Flame Retardants for Cotton	2	141
(Reeves, Guthrie). Cotton Made Flame-Resistant with Bromine-Containing Phosphonitrilates in Combination with THPC Resins	2	145
HAMBURGER, W. J. (Fox). A New Process for Compacting Textile Materials. I: Research and Development	6	441
II: Industrial Applications	6	448
HAMBY, D. S. (Stuckey). A Study of the Uster Dynamometer and the Scott TP-2	9	717
HANCE, L. H. High Production Drawing: Some Fundamental Considerations	5	385
HANNAN, P. J. A Method for Controlling Cationic Exchange in Cotton	12	948
HARA, H. (Sado, Hashimoto). A Simplified Cross-Sectioning Method for Observation of Skin and Core of Rayon (*Letter*)	1	44
HARRIS, M. (Bogaty, Hollies). The Judgment of Harshness of Fabrics	5	355
HARRIS, W. C. (Bernet, Dunn, Jr.). Trouble Shooting in Textile Processing by Use of the Brush Uniformity Analyzer	7	569
HASHIMOTO, I. (Hara, Sado). A Simplified Cross-Sectioning Method for Observation of Skin and Core of Rayon (*Letter*)	1	44
HEARLE, J. W. S. The Dielectric Properties of Fiber Assemblies	2	108
HERSH, S. P. (Montgomery). Static Electrification of Filaments: Theoretical Aspects*	12	903
HERTEL, K. L. (Craven). Cotton Fiber Bundle Elongation and Tenacity as Related to Some Fiber and Yarn Properties	6	479
HOFFPAUIR, C. L. (Blouin, Reeves). Influence of Moisture Sorption and Other Pretreatments on the Acetylation of Cotton with Acetic Anhydride and Pyridine	4	272
HOLLIES, R. S. (Bogaty, Harris). The Judgment of Harshness of Fabrics	5	355
(Kaessinger, Bogaty). Water Transport Mechanisms in Textile Materials. I: The Role of Yarn Roughness in Capillary-Type Penetration	11	829
HONEGGER, F. An Evaluation and Comparison of Evenness Testers (*Letter*)	5	351
HONOLD, E. (Boucher, Skau). The Effect of Partial Acetylation on the Pore-Size Distribution of Cotton Fabrics	4	263
HORINO, T. (Fujino, Kawai, Miyamoto). Experimental Study of the Viscoelastic Properties of Textile Fibers. II: The Influence of Physical Treatments upon the Dynamic Properties of Some Fiber-Forming Polymers†	11	852
HOUFF, W. H. (Beaumont). Chemical Damage in Wool. I: Determination by Paper Chromatography	11	871
HOWARD, J. H. The Effect of Chlorine and Subsequent Treatment with Sodium Bisulfite upon the Physical Properties of Cotton Fabrics Treated with Various Resins	2	124
HUMAN, J. P. E. The Preparation of Fibers from Small Quantities of Protein Solutions (*Letter*)	6	439
HUMMEL, G. H., Jr. (Donovan, Beegan). Identification of Textile Fibers by Dye Staining Techniques (*Letter*)	3	227
HUMPHREYS, G. C. (McDonald, Kromhout, Grant). Physical Properties of Chemically Modified Cottons. I: Properties of the Untreated Cottons	8	641
(McDonald, Orr, Grant). II: Effects of Partial Acetylation	8	646
ILLINGWORTH, J. W. (Kilby). The Reversible Effect of Temperature on the Mechanical Properties of Tire Yarns and Cords	4	243
IWANOW, N. (Schneider). The Study of the Phenomena of Diffusion and Adsorption of Direct Dyes in Viscose Fibers by the Method of Differential Dyeing (Part I)	6	407
JOHNSON, G. H. Effect of Laundering on Shirts (*Letter*)	9	680

SUBJECT INDEX

	NO.	PAGE
ACETYLATION, *see* Cotton		
AIR CONDITIONING, unit for fiber research laboratories (*Timmerman, Letter*)	6	438
ANTISEPTIC TREATMENTS, *see* Bacteriostatic reagents		
AXMINSTER CARPETS, performance characteristics of synthetic fibers, wool, viscose, and blended fibers in (*Schappel*)	3	211
BACTERIOSTATIC REAGENTS, evaluation of and methods of application to textile fabrics (*Sherrill*)	5	342
BETA-PROPIOLACTONE		
physical properties of cotton reacted with (*Nolt, Grant*)	9	673
(*Reinhardt, Reid, Daul*)	1	1
BULK COMPRESSION, of staple fibers, improved method for (*Fok, Finzel, Letter*)	9	684
CELLULOSE, *see also* Cotton		
cotton cellulose, note on the preparation of a partial ester of in fabric form (*Bullock, Schreiber, Guthrie*)	5	340
hydrolytic degradation of, *see* Cellulose, rate of degradation		
influence of the fiber structure on the nitration of (*Miller, Timell*)	4	255
rate of degradation of, to the oligosaccharide stage in phosphoric acid solution, XXI (*Martin, Pacsu*)	3	192
CELLULOSE INTERACTIONS, with certain textile resins (*Lineken, Davis, Jorgensen*)	12	940
CHEMICAL MODIFICATION, *see* Cotton, *also* Fabrics, *also* Wool		
CHROMATOGRAPHY, paper, determination of chemical damage in wool by, I (*Houff, Beaumont*)	11	871
CLOTH GEOMETRY, *see also* Fabric structure		
nomographic solution of the geometric relationships in (*Adams, Schwarz, Backer*)	9	653
COLLOIDAL SILICA, effect of treatments, on sizing and finishing characteristics of cotton yarns (*Brown, Langston, Murray*)	1	40
CONTROL CHART, survey of applications in textile processing (*Enrick*)	4	313
COTTON		
acetylation of, with acetic anhydride and pyridine, influence of moisture sorption and other pretreatments on (*Blouin, Reeves, Hoffpauir*)	4	272
acetylating vat-dyed, improved weather resistance by (*Berard, Gremillion, Jr., Goldthwait*)	1	81
bale packaging, improved, and its effects at the mill (*Pfeiffenberger*)	6	470
breaking strength, cotton fiber bundles (*Nanjundayya, Letter*)	9	682
cationic exchange in, a method for controlling (*Hannan*)	12	948
chemically modified, physical properties of, selected samples (*Grant*)	1	74
I: properties of untreated cottons (*McDonald, Humphreys, Kromhout, Grant*)	8	641
II: effects of partial acetylation (*McDonald, Humphreys, Orr, Grant*)	8	646
comparative quality characteristics, of selected growths in the 1955 crop (*Cook*)	7	534
crease-resistant finishes, application of (*Smith*)	11	836
cyanoethylated, effect of alkaline hydrolysis on the properties of (*Mazzeno, Jr., Reinhardt, Reid, Dickson*)	8	597
cyanoethylation of (*Compton, Martin, Word, Jr., Barber*)	1	47
cotton cellulose, the cellulose-sodium hydroxide-water system in the (*Weaver, Klein, Webre, DuPré*)	7	518
one-step process for (*Gruber, Bikales*)	1	67
density of degraded, comparison of gradient and flotation methods for determining (*Austin, Roberts*)	4	303
determining twist, in carded cotton single yarns, limitations of the indirect untwist-twist and direct-counting methods for (*Worner*)	6	455
effects of fiber fineness (Micronaire), on the weaving contraction in selected (*Kennamer, Mayne, Jr., Berkley*)	10	812
fiber fineness (Micronaire), effects of on the weaving contraction in selected cotton fabrics (*Kennamer, Mayne, Jr., Berkley*)	10	812
Micronaire value, the prediction of for a bale or a group of bales, a statistical study (*Brenner, Scocca*)	11	899
minimum-care fabrics (*Stam, Poon, Spangler, Underwood*)	12	960
neppiness, determination of in carded cotton webs (*Chamberlain, Jordan*)	8	579
partial acetylation, effects of on physical properties of chemically modified cottons (*McDonald, Humphreys, Orr, Grant*)	8	646
partially cyanoethylated, the effect of laundering, mercerizing, and simulated vat dyeing on the properties of (*Reinhardt, Markezich, Moore, Reid*)	6	423
pore-size distribution of, effect of partial acetylation on (*Honold, Boucher, Skau*)	4	263
quality and fiber properties, IV: relation between single fiber properties and the behavior of bundles, slivers, and yarns (*Virgin, Wakeham*)	3	177
V: effects of fiber fineness (*Leilgeb, Wakeham*)	7	543
VI: comparison of a matched pair of raingrown and irrigated cottons(*Wakeham*)	12	925
reacted with beta-propiolactone, physical properties of (*Nolt, Grant*)	9	673
(*Reinhardt, Reid, Daul*)	1	1
soiling, microscopical research on (*Porter, Peacock, Moore, Tripp, Rollins, Abstract*)	1	66
treated with various resins, effect of chlorine and subsequent treatment with sodium bisulfite upon physical properties of (*Howard*)	2	124
COTTON FIBER, *see also* Cotton		
bundle break elongation, effect of and other properties on the properties of a coarse and a medium singles yarn (*Fiori, Sands, Little, Grant*)	7	553
bundle breaking strength (*Nanjundayya, Letter*)	9	682
bundle elongation and tenacity, as related to some fiber and yarn properties (*Hertel, Craven*)	6	479
crystallite orientation in, determination of the degree of by means of the recording X-ray diffraction spectrometer (*Creely, Segal, Ziifle*)	10	789
effect of strength of, on the properties of 2-ply carded yarns (*Fiori, Brown, Sands*)	4	296
fiber properties and cotton quality, VI: comparison of a matched pair of raingrown and irrigated cottons (*Wakeham*)	12	925
single fiber properties, relation between and the behavior of bundles, slivers, and yarns (*Virgin, Wakeham*)	3	177
COTTON, FLAME-RESISTANT		
bromine-containing phosphonitrilates, as flame retardants for (*Hamalainen, Guthrie*)	2	141
in combination with THPC resins (*Hamalainen, Reeves, Guthrie*)	2	145
compounded flame retardant, for fabrics (*Reid, Frick, Jr., Arceneaux*))	2	137
flame-retardant treatments for, three recent developments (*Reid*)	2	136
fluorine and iodine compounds, as flame retardants for (*Frick, Jr., Reid, Moore*)	7	525
COTTON LUSTERMETER, new (*Nickerson*)	7	552
COTTON YARNS, colloidal silica treatment, effect on sizing and finishing characteristics (*Brown, Langston, Murray*)	1	40
CREASE RECOVERY, fabric, the effect of yarn twist on (*Steele*)	10	739
CRIMP, *see* Wool		
CROSS-SECTIONING, simplified method for observation of skin and core of rayon (*Hara, Sado, Hashimoto*)	1	44
CRYSTALLINITY		
crystallite orientation, degree of in cotton fibers, determination by means of the recording X-ray diffraction spectrometer (*Creely, Segal, Ziifle*)	10	789
CYANOETHYLATION, *see* Cotton, *also* Wool.		
DRAW FRAME, Whitin Even-Draft, high production with the (*Swift, Jr.*)	5	388
DRAWING		
high production, some fundamental considerations (*Hance*)	5	385
Saco-Lowell Versa-Matic (*Jones*)	5	398
DRAWING SLIVER, spinning coarse yarns from (*Moyer*)	6	485
DYEING		
differential, the study of the phenomena of diffusion and adsorption of direct dyes in viscose fibers by the method of (*Iwanow, Schneider*)	6	407
nylon, with acid dyes, studies of, II: kinetics of the process (*Atherton, Peters*)	7	497
wool, the effect of solvents on (*Kärrholm, Lindberg, Letter*)	7	528
DYES		
acid, dyeing of nylon with, kinetics of the process (*Atherton, Peters*)	7	497
direct, the study of the phenomena of diffusion and adsorption of in viscose fibers by the method of differential dyeing, I (*Iwanow, Schneider*)	6	407
staining techniques, identification of textile fibers (*Donovan, Beegan, Hummel, Jr., Letter*)	3	227
ELECTRICAL PROPERTIES, *see also* Static electrification		
dielectrical properties of fiber assemblies (*Hearle*)	2	108
ELECTRON MICROSCOPY, the application of to synthetic fibers (*Scott, Ferguson*)	4	284
Correction	5	350
EVENNESS TESTERS		
Brush Uniformity Analyzer, trouble shooting in textile processing by use of the (*Bernet, Dunn, Jr., Harris*)	7	569
evaluation and comparison of (*Honegger, Letter*)	5	351
(*Waters, Letter*)	5	352
FABRIC ESTER		
note on the preparation of a partial ester of cotton cellulose in fabric form (*Bullock, Schreiber, Guthrie*)	5	340
FABRIC STRUCTURE		
structural geometry and physical property relationships, V: the interaction of twist and twill direction as related to fabric structure (*Backer, Zimmerman, Best-Gordon*)	2	87
VI: nomographic solution of geometric relationships in cloth geometry (*Adams, Schwarz, Backer*)	9	653

NO. PAGE

FABRICS
antiseptic treatments for, *see* Bacteriostatic reagents
cellulose, mechanical properties of, treated with monomethylol and dimethylol ureas (*Steele, Giddings, Jr.*) . . 2 116
copper process, for prolonged microbiological protection of cellulosic fabrics by chemical modification (*Abrams, Bottoms*) 8 630
cotton, resin finishing, variables of cure in (*Foster*) 2 149
crease recovery, the effect of yarn twist on (*Steele*) 10 739
grab strength and strip strength, relation between (*Eeg-Olofsson, Eernskiöld*) 6 431
harshness, the judgment of (*Bogaty, Hollies, Harris*) 5 355
improved Navy overcoat fabric, design and laboratory evaluation of (*Press*) 1 23
minimum-care, *see also* Fabrics, wash and wear
cotton (*Stam, Poon, Spangler, Underwood*) 12 960
viscose rayon (*Scott, Jr.*) 12 966
synthetic, finishing of (*Cooke, Roth*) 3 229
tearing strength, measurement of (*Turl*) 3 169
a multiple specimen single-rip test (*Turl, Letter*) 10 802
two-bar tricot fabrics, the geometry and properties of (*Fletcher, Roberts*) 11 889
wash and wear
cottons, characteristics of (Lippert) 2 128
home laundering of wash and wear garments of hydrophobic fibers (*Rawlings, Stanley, Wilkinson*) 12 974
washer and wearer, are we thinking of the (*Labarthe*) . . . 12 957
yarn twist, effect of on crease recovery of (*Steele*) 10 739
FIBER DIAMETER, and effective crimp diameter, the relation between for two types of wool fibers (*Shiloh, Muhsam, Lewin, Alexander, Letter*) 10 803
FIBER FINENESS
effects of, on cotton quality and fiber properties (*Leilgeb, Wakeham*) 7 543
Micronaire, the effects of on the weaving contraction in selected cotton fabrics (*Kennamer, Mayne, Jr., Berkley*) . 10 812
FIBER LENGTH TESTER, with automatic punched-card registration (*Wakelin, Lambert, Montgomery*) 9 665
FIBER PROPERTIES, *see also* Fibers
arrangement of in single yarns, *see* Yarn structure
bundle break elongation, cotton, effect of and other fiber properties on the properties of a coarse and a medium singles yarn (*Fiori, Sands, Little, Grant*) 7 553
crystallinity, iodine sorption as an index of (*Majury, Letter*) . 6 437
dielectric properties of, fiber assemblies (*Hearle*) 2 108
identification by dye-staining techniques (*Donovan, Beegan, Hummel, Jr., Letter*) 3 227
nuclear radiation, effect of on fibrous materials, I: Dacron polyester fiber (*Teszler, Rutherford*) 10 796
polyvinyl alcohol (*Carpenter, Wheeler*) 4 317
protein, *see* Protein fibers
second-order transition temperature and (*Eeg-Olofsson, Letter*) 5 352
(*Brown, Reply*) 5 353
staple, improved method for bulk compression of (*Fok, Finzel, Letter*) 9 684
synthetic, the application of electron miscroscopy to (*Scott, Ferguson*) 4 284
Correction 5 350
synthetic, wool, viscose, and blended, performance characteristics in Axminster carpets (*Schappel*) 3 211
Teflon, tetrafluoroethylene fiber (*Rivers, Franklin*) 10 805
viscoelastic properties of textile fibers. II: the influence of physical treatments upon the dynamic properties of some fiber-forming polymers (*Fujino, Hawai, Horino, Miyamoto*) 11 852
FIBERS, CELLULOSIC
the reaction of formaldehyde with, I: rate and mechanism of the reaction (*Woo, Dusenbury, Dillon*) 10 745
II: mechanical behavior (*Woo, Dillon, Dusenbury*) 10 761
FIBROUS POLYMERS, stress-relaxation and vibrational properties of some at various conditions of temperature and relative humidity (*Price, McIntyre, Pattison, Dunell*) . . 4 276
FILAMENTS
static electrification of (*Levy, Dillon, Letter*) 12 953
theoretical aspects (*Hersh, Montgomery*) 12 903
FINISHES, *see also* Cotton, *also* Fabrics
crease-resistant, the application of to cotton (*Smith*) . . . 11 836
flame-retardant, theory of (*Gottlieb*) 2 156
fluorine and iodine compounds, as flame retardants for cotton (*Frick, Jr., Reid, Moore*) 7 525
resin finishing, cotton, variables of cure in (*Foster*) 2 149
synthetic fabrics, finishing of (*Cooke, Roth*) 3 229
textile resins, cellulose interactions with (*Lineken, Davis, Jorgensen*) 12 940
FLAMEPROOFING AND FLAME-RETARDANT TREATMENTS, *see also* Cottons, flame-resistant
cellulose-phosphate-urea reaction, some aspects of (*Nuessle, Ford, Hall, Lippert*) 1 32
flame-retardant finishes, theory of (*Gottlieb*) 2 156
FLOTATION AND GRADIENT METHODS, a comparison of, for determining density of degraded cotton (*Auslin, Roberts*) 4 303
FORMALDEHYDE, reaction of with cellulosic fibers, *see* Fibers, cellulosic

GRAB STRENGTH, and strip strength of fabrics, relation between (*Eeg-Olofsson, Bernskiöld*) 6 431

NO. PAGE

GRADIENT AND FLOTATION METHODS, a comparison of for determining density of degraded cotton (*Austin, Roberts*) 4 303
GOOSE DOWN, the effect of aluminum powder on the heat insulation of (*Niven*) 6 430
GORDON RESEARCH CONFERENCES, AAAS 4 323

HARSHNESS, the judgment of in fabrics (*Bogaty, Hollies, Harris*) 5 355
HOME LAUNDERING, of wash and wear garments of hydrophobic fibers (*Rawlings, Stanley, Wilkinson*) 12 974

IMPACT TESTS, TRANSVERSE, IV: stress-strain relationships in yarns subjected to rapid impact loading (*Smith, McCrackin, Schiefer, Stone, Towne*) 11 821
INDUSTRIAL TEXTILES (*Sherman*) 12 970
INSULATION, heat, of goose down, the effect of aluminum powder on (*Niven*) 6 430
IODOFORM REACTION, on jute hydrolysate (*Sanyal, Letter*) 4 310

JUTE FIBER, twisted bundles, breaking strength of, its relation to spinning quality (*Chakrabarti*) 1 17
JUTE HYDROLYSATE, iodoform reaction on (*Sanyal, Letter*) 4 310

LAUNDERING, effect of on shirts (*Grimes, Werman, Letter*) . . 2 112
(*Johnson, Letter*) 9 680
(*Grimes, Werman, Reply*) 9 681
LUSTERMETER, a new cotton (*Nickerson*) 7 552
LOOM-ACTION-TYPE ABRADER (*Ramires, Vidosic*) . . . 7 531

MECHANICAL PROCESSING
high production drawing, some fundamental considerations (*Hance*) 5 385
metallic rolls, high production with (*Whitehurst*) 5 394
spindle bearing, lubrication of (*Vidosic, Cheverton*) 8 622
spindle drafting of woolen slubbings (*Angus, Martindale*) 9 698
super high-draft spinning, sliver to yarn (*Rudnick*) . . . 6 489
Versa-Matic drawing, Saco-Lowell (*Jones*) 5 398
Whitin Even-Draft draw frame, high production with the (*Swift, Jr.*) 5 388
MERCERIZING, the effect of on the properties of partially cyanoethylated cotton (*Reinhardt, Markezich, Moore, Reid*) 6 423
METALLIC ROLLS, high production with (*Whitehurst*) . . . 5 394
MICROBIOLOGICAL PROTECTION, of cellulosic fabrics, a copper process for by chemical modification (*Abrams, Bottoms*) 8 630
MICRONAIRE, fiber fineness, the effects of on the weaving contraction in selected cotton fabrics (*Kennamer, Mayne, Jr., Berkley*) 10 812
MINIMUM CARE, *see also* Wash and Wear
cotton fabrics (*Stam, Poon, Spangler, Underwood*) 12 960
viscose rayon, fabrics of (*Scott, Jr.*) 12 966

NEW PROCESS
for compacting textile materials, I: research and development (*Hamburger, Fox*) 6 441
II: industrial applications 6 448
NITRATION, of cellulose, influence of the fiber structure on the (*Miller, Timell*) 4 255
NOMOGRAPHIC SOLUTION, of the geometric relationships in cloth geometry (*Adams, Schwarz, Backer*) 9 653
NUCLEAR RADIATION, the effect of on fibrous materials, I: Dacron polyester fiber (*Teszler, Rutherford*) 10 796
NYLON, dyeing of, with acid dyes, II: kinetics of the process (*Atherton, Peters*) 7 497

ORGANIC SILICON COMPOUNDS, studies on water repellency of (*Nakao, Wada, Nakasima, Nozakura*) 10 784
ORTHO- AND PARA-CORTICAL CELLS, the distribution of in wool and mohair (*Fraser, Macrae, Letter*) 8 618

PACKAGING, cotton bale, improved (*Pfeiffenberger*) 6 470
PILLING TESTER, Random Tumble (*Baird, Legere, Stanley*) . 9 731
POLYVINYL ALCOHOL, as a warp size for various staple yarns (*Abrams, Rougeaux, Coker*) 11 875
POLYVINYL ALCOHOL FIBERS (*Carpenter, Wheeler*) . . . 4 317
PROTEIN FIBERS
man-made, progress in (*Gillespie, Jr.*) 11 881
preparation of fibers from small quantities of protein solutions (*Human, Letter*) 6 439
PUNCHED-CARD REGISTRATION, automatic, a fiber length tester with (*Wakelin, Lambert, Montgomery*) . . . 9 665

RAMIE, some physical observations on (*Bose, Letter*) 2 114
RAVELED TEST SPECIMENS, uniform, a fabric designed for rapid preparation of (*Shapiro, Letter*) 8 620
RAYON, cross-sectioning method, simplified, for observation of skin and core of (*Hara, Sado, Hashimoto, Letter*) 1 44
RECORDING X-RAY DIFFRACTION SPECTROMETER, determination of the degree of crystallite orientation in cotton fibers by means of the (*Creely, Segal, Ziifle*) . . . 10 789
RESIN FINISHES, *see* Fabrics

SAMPLING, improved, and Shirley analyzer operating procedure (*Shepherd, Letter*) 4 311
SECOND-ORDER TRANSITION TEMPERATURE, and fiber properties (*Eeg-Olofsson, Letter*) 5 352
(*Brown, Reply*) 5 353

	NO.	PAGE
SHIRLEY ANALYZER, operating procedure and improved sampling (*Shepherd, Letter*)	4	311
SHRINKAGE CONTROL		
new process for compacting textile materials, I: research and development (*Hamburger, Fox*)	6	441
II: industrial applications	6	448
SILICON COMPOUNDS, organic, studies on water repellency of (*Nakao, Wada, Nakasima, Nozakura*)	10	784
SPECTROMETER, recording X-ray diffraction, determination of the degree of crystallite orientation in cotton fibers by means of the (*Creely, Segal, Zisfle*)	10	789
SPINDLE BEARING, textile, lubrication of (*Vidosic, Cheverton*)	8	622
SPINDLE DRAFTING, of woolen slubbings (*Angus, Martindale*)	9	698
SPINNING		
coarse yarns from drawing sliver (*Moyer*)	6	485
historical and technical aspects of (*Rusca, Brown*)	6	460
quality, the characterization of (*Bogdan*)	9	720
super high draft, sliver to yarn (*Rudnick*)	6	489
STATIC ELECTRIFICATION		
of filaments (*Levy, Dillon, Letter*)	12	953
theoretical aspects (*Hersh, Montgomery*)	12	903
STRESS-STRAIN RELATIONSHIPS in yarns subjected to rapid impact loading, IV: transverse impact tests (*Smith, McCrackin, Schiefer, Stone, Towne*)	11	821
SYNTHETIC FABRICS, *see* Fabrics		
SYNTHETIC FIBERS, *see* Fibers		
TEARING STRENGTH, of textile fabrics, the measurement of: a multiple specimen single-rip test (*Turl, Letter*)	10	802
TEFLON, tetrafluoroethylene fiber (*Rivers, Franklin*)	10	805
TEXTILE MATERIALS		
compacting, a new process for, I: research and development (*Hamburger, Fox*)	6	441
II: industrial applications	6	448
TETRAFLUOROETHYLENE FIBER, Teflon (*Rivers, Franklin*)	10	805
TEXTILE PROCESSING		
Brush Uniformity Analyzer, trouble shooting by use of (*Bernet, Dunn, Jr., Harris*)	7	569
control chart applications, survey of (*Enrick*)	4	313
THERMAL INSULATION, *see* Goose down		
THIURONIUM CHLORIDE, in methylpolysiloxane, water resistance of fabrics treated with (*Nakao, Wada, Nakasima, Nozakura*)	10	784
TIRE YARNS AND CORDS, reversible effect of temperature on the mechanical properties of (*Illingworth, Kilby*)	4	243
TWIST DETERMINATION, *see also* Yarns		
carded cotton single yarns, limitations of the indirect untwist-twist and direct-counting methods for (*Worner*)	6	455
cotton hawser-twist cord, the effect of twist on the static modulus of (*Tallant, Brown*)	7	523
USTER DYNAMOMETER, and the Scott IP-2, a study of (*Hamby, Stuckey*)	9	717
VAT DYEING, simulated, the effect of on the properties of partially cyanoethylated cotton (*Reinhardt, Markezich, Moore, Reid*)	6	423
VISCOSE FIBERS, the study of the phenomena of diffusion and adsorption of direct dyes in by the method of differential dyeing (*Iwanow, Schneider*)	6	407
WARP SIZE, *see also* Cotton yarns		
polyvinyl alcohol as a warp size for various staple yarns (*Abrams, Rougeux, Coker*)	11	875
WARP- SIZING, evaluation of, *see* Loom-action-type abrader		
WASH AND WEAR, *see also* Minimum care		
cottons, characteristics of (*Lippert*)	2	128
home laundering, of wash and wear garments of hydrophobic fibers (*Rawlings, Stanley, Wilkinson*)	12	974
washer and wearer, are we thinking of the (*Labarthe*)	12	957
WATER REPELLENCY		
organic silicon compound, III: water resistance of fabrics treated with methylpolysiloxane containing thiuronium chloride (*Nakao, Wada, Nakasima, Nozakura*)	10	784
water transport mechanisms, in textile materials, I: role of yarn roughness in capillary-type penetration (*Hollies, Kaessinger, Bogaty*)	11	829
WOOL		
Axminster carpets, performance characteristics of fibers in (*Schappel*)	3	211
bilateral structure		
distribution of ortho- and para-cortical cells in wool and mohair (*Fraser, Macrae, Letter*)	8	618
Pakistani carpet wool, the bilateral cortical structure of (*Ahmad, Lang, Letter*)	12	954
blended woolen structures, III: amplification and extended application of the theory of blend statistics (*Coplan, Klein*)	12	914
chemical damage in, I: determination by paper chromatography (*Houff, Beaumont*)	11	871
crimp of textile fibers, definition and measurement of (*Alexander, Lewin, Muhsam, Shiloh*)	8	606
dimensional changes and related phenomena of, under stress (*Banky, Slen*)	3	204
effective crimp diameter and fiber diameter for two types of wool fibers, the relation between (*Shiloh, Muhsam, Lewin, Alexander, Letter*)	10	803
modification of, with monofunctional isocyanates (*Moore*)	12	936
mohair, the distribution of ortho- and para-cortical cells in (*Fraser, Macrae, Letter*)	8	618
softness of handle of, in the greasy and scoured states and its physical characteristics, the relation between (*Roberts*)	9	687
sulfhydryl groups in, estimation of by means of 1-(4-chloromercuriphenylazo)-naphthol-2 (*Burley*)	5	332
WOOL DYEING, the effect of solvents on (*Kärrholm, Lindberg, Letter*)	7	528
WOOL FELTING, and single fiber properties, relation between (*Van der Vegt, Schuringa*)	1	9
WOOL RESEARCH		
International Wool Textile Research Conference Seminar		
general remarks on the conference (*Dillon*)	5	361
morphology and chemical modification (*Lazer*)	5	365
highlights of papers on physical and protein chemistry (*Lundgren*)	5	372
biology and manufacture (*Menkart*)	5	377
list of papers at Australian conference, 1955	5	380
WOOLEN SLUBBINGS, spindle drafting (*Angus, Martindale*)	9	698
X-RAY DIFFRACTION SPECTROMETER, determination of the degree of crystallite orientation in cotton fibers by means of the (*Creely, Segal, Zisfle*)	10	789
YARN MODULUS, a continuous method of measuring (*Brown*)	7	565
YARN, SINGLES		
arrangement of fibers in (*Morton*)	5	325
carded cotton, limitations of the indirect untwist-twist and direct-counting methods for determining twist in (*Worner*)	6	455
cotton fiber bundle break elongation and other fiber properties, effect of on properties (*Fiori, Sands, Little, Grant*)	7	553
YARN STRENGTH, spinning quality, the characterization of (*Bogdan*)	9	720
YARN STRUCTURE, *see also* Fibers		
arrangement of fibers in single yarns (*Morton*)	5	325
YARN TESTING, SINGLE-STRAND		
Uster Dynamometer and Scott IP-2, a study of (*Hamby, Stuckey*)	9	717
YARN TWIST, effect on fabric crease recovery (*Steele*)	10	739
YARNS, *see also* Cotton yarns		
Brush Uniformity Analyzer, trouble shooting in textile processing by use of the (*Bernet, Dunn, Jr., Harris*)	7	569
coarse, spinning from drawing sliver (*Moyer*)	6	485
cotton fiber bundle break elongation, and other fiber properties, effect of on the properties of a coarse and medium singles (*Fiori, Sands, Lillle, Grant*)	7	553
determining twist, in carded cotton single yarns, limitations of the indirect untwist-twist and direct-counting methods for (*Worner*)	6	455
2-ply carded, the effect of cotton fiber strength on the properties of (*Fiori, Brown, Sands*)	4	296
staple, various, polyvinyl alcohol as a warp size for (*Abrams, Rougeux, Coker*)	11	875
stress-strain relationships in, subjected to rapid impact loading, IV (*Smith, McCrackin, Schiefer, Stone, Towne*)	11	821

BOOK REVIEWS

Achievement of Lighting Standards for the Grading of Cotton. Dorothy Nickerson (1956)	12	980
A Bibliographical Study of Literature Published on Fibre Blends Commencing with the Year 1948. The Textile Society of Canada (1956)	12	980
Cellulose Nitrate, the Physical Chemistry of Nitrocellulose, Its Formation and Use. Frank Douglas Miles (1955)	1	46
Chemistry and Chemical Technology of Cotton. Kyle Ward, Jr., (Ed.) (1955)	6	495
The Chemistry of Synthetic Dyes and Pigments. H. A. Lubs (Ed.) (1955)	2	168
Directory of Commercial and College Testing Laboratories. A.S.T.M. (1955)	2	167
Hydrogen Peroxide. W. C. Schumb, C. N. Satterfield, and R. L. Wentworth (1955)	8	652
Industrial Detergency. William W. Niven, Jr. (1955)	6	496
Instruments for Measurement and Control. Warner G. Holzbock (1955)	6	496
The ISCC-NBS Method of Designing Colors and a Dictionary of Color Names. National Bureau of Standards Circular 553 (1955)	10	801
Man in Cold Environment—A Study in Physiology. Loren D. Carlson (1954)	9	738
The Mechanical Characters of Jute. K. R. Sen (1954)	4	322
Modern Mill Controls in the Management of Production, Quality, Waste, and Maintenance. Norbert Lloyd Enrick (1956)	12	980

	NO.	PAGE
The New Sales Promotion in the Textile Industry. James C. Cumming (1955)	10	801
Plastics for Corrosion Resistant Applications. Raymond D. Seymour and Robert H. Steiner (1955)	8	652
Principles of Mass and Flow Production. Frank G. Woollard (1955)	9	738
Quality Control Through Statistical Methods. Norbert Lloyd Enrick (1954)	9	737
Review of Textile Progress, 1954. The Textile Institute and Society of Dyers and Colourists (1955)	9	736
Some Aspects of the Crystallization of High Polymers. G. Schuur (1955)	7	577
The Structural Chemistry of Proteins. H. D. Springall (1954)	7	578
Study of the Control of Permeability of Nylon Parachute Cloth at High and Low Differential Pressures. Hamilton J. Bickford, Donald K. Kuehl, and Thomas L. Rusk, Jr. (1955)	9	737
Testing and Control in the Wool Industry. Wool Industries Research Association (1955)	9	736
Textile Quality Control Papers. D. S. Hamby (Ed.) (1955)	9	737
Textiles and Testing Course of Study. U. S. Testing Co., Inc. (1956)	9	737
Wet-Cold I, Effects of Moisture on Transfer of Heat Through Insulating Materials. Alan H. Woodcock and Thomas E. Dee, Jr. (1950)	9	738

TEXTILE RESEARCH INSTITUTE PUBLICATIONS

A limited supply of the publications listed below is still available. The first three comprise information gathered by teams of investigators immediately following the German surrender. They are still of current interest and are valuable for reference.

Textile Testing in Germany, 1948. 57 pages. Price $3.50.

Mothproofing of Woolen Materials in Europe, 1946. 28 pages, 28 photomicrographs, some in color. Price $1.50.

Textile Microscopy in Germany, 1950. 147 pages. Price $4.00.

Weavability Graphs, 1955. Sets of five graphs in large size for use by fabric designers. These graphs will take the guesswork out of design. Price $5.00.
